

### SPOT SAFE THINGS

A safe water depth – lapping at the bottom of the slipway  
 Clear water below jumpers – no boats or people in the way  
 Ladder to climb out – hold on tight as it might be slippery  
 Chain and rope at the slipway – you can use to climb out  
*Sula* has left – always follow instructions from the skipper  
 How many lifebuoys are at the harbour, and where are they?

### SPOT DANGEROUS THINGS

Jumping in front of harbour entrance  
 Boat coming out of harbour entrance  
 Always get out of the water if *Sula* approaches – listen for the horn
